The Tenth Volume

Of the "WILMINGTON JOURNAL," commences with this number. We would like, on the present occasion, to discourse a while with cur readers, on the ups and downs, the progress, and other matters connected with our establishment-the success and unsuccessful-and whatever might be deemed worthy of note, on the commencement of our 10th year of existence in Wilmington. All these things, and more too, might be jotted down and sent forth to the world for criticism, reflection, and family conversation; but as our writing Editor, who is much more of a philosopher than his "worthy" associate is, can or ever will be, is now absent, enjoying the cool breezes of a Northern latitude, and we-the "worthy"-having our hands full with the business concerns of our establishment, prefer to give all these things the go-by.

We are told, however, this is an age of progress. Well, we have progressed so far, pretty well, with our Weekly-this being the 1st No. of the Tenth Volume. Our subscribers have been very kind and nunctual, for which we hereby return them our most hearty and earnest thanks, as well as to our generous advertising customers in this paper and the Daily Journal. To offer our thanks thus promptly, is the chief object of this notice; but will our generous patrons, and their 4000 friends in general, and the public at large allow us, just moderately to night, gotaboard the magnificent steamer North Carhint, that we think, (just privately to ourselves like,) that our subscription list ought to progress, as other things progress, in this age of progress. We intend our weekly, daily, hourly, unremitting hard work upon the paper shall progress, and we mean to take all pains to keep pace with the times. And we hope that this large Democratic District, num- about among and between the berths, where peobering upwards of 10,000 voters, will come forward, ple are supposed to sleep. One fellow, I am cerand instead of subscribers, send us money enough tain, on Friday night, chalked the soles of my to appear somewhat proportionate to the size of the boots, and then the soles of my feet, and I am by no District.

town, and elsewhere, the only, and we think very capital fellows, and very accommodating. cheap daily paper, by which they can be constantly kept advised of the commercial and other news of ery respect, both in business and buildings. It is by Carolina

Remember every type and every letter in this paper, from one year's end to another, is handled twice fifteen Wilmington folks at Barnum's, in Baltimore, for each issue-once to set it up, and once to return the type to its particular box,-besides press-work everybody, almost, is, or has been, or is going to be -cost of paper, and ink, and ware and tare of ma- North this fall. > Money was tighter .- Washington Union, 4th inst. The President's purpose in his appointments, namely: to consolidate and strengthen the democratic party, has been successful in one section—the most democratic section-of the country, at least, as is confessed by the opponents of the administration. We quote from the New York Courier :-

"After the passage of the compromise the majority of the southern democracy, under the name of the 'Southern Rights' party, took a bold stand against acquiescence in those measures. They denounced the compromise as a fraud and an insult to the south; the very name of compromise was rejected with scorn and loathing; acquiescence was need scarcely add that it is with pride and pleasure called base and cowardly submission to intolerable oppression. They were for disunion and a south- Savannah Courier, of Saturday last, has the followern confederacy. Upon this issue the southern ing: states, and even after it became apparent that their State, who recently visited Europe, has succeeded in cause was lost, they fought the battle out with a resolution worthy of a better cause; but after a fiercely contested struggle, they were utterly routed and beaten into the very dust. In the four states of Francisco and China. The object of the company 18 Georgia, South Carolina, Alabama and Mississippi, to construct a railroad direct from Savannah to Penout of an aggregate vote of 250,000, only about 110,000 were cast for the so-called dismaionist or from the Gulf to the Pacific. The connections on the anti-compromise candidates.

Neil McPherson, of Florida, timber agent for West Fl. da, from 16th August, 1853.

J. F. H. Claiborne, of Mississippi, timber agent for Loniana and Mississippi, from 23d April, 1853. John A. Cuthbert, of Georgia, timber agent for southedistrict of Alabama, from 27th August, 1853. Wm. S. Turner of Alabama, timber agent for norther district of Alabama, from 27th August, 1853.

The Government have recently been apprised of existence in large quantities on our Southern coast a most valuable article of commerce with Chin before known to be obtainable here. We what is known in science as Bicho do mar, co in the language of commerce in to Beche lam Chinese call it Tropang. The attention of the Washington whose duty it is to see that our ri resources are developed as much as possible been called to this new source of wealth by a distinguished naturalist. This article is called on on coasts the sea slung, and will be recognised as anu seemly, jelly looking substance of a dirty brown col-

A very Important Discovery.

The Chinese use it as we do Ice Jand moss and isin glass. It is taken to them in immense conantities from the tropical sheres of Asia and Australia, annuagily. It is caught by hand in shallow water, and usually speared in deeper water; and, after being dried in the sun, it is smoked over a wood fire, when it is ready for shipment. Macassar is at present the principal point from whence it is shipped to China. At that point, from which some eight or nine hundred thous and weight are now annually sent to China, its value varies from \$8 to \$110 per Picul (of 133h lbs.) according to quality; there being some thirty different qual Guinea, the southern shores of Australia to Cevlon and latterly the shores of Mauritas, supply large quantities of it. Now, according to the last annual Commerce and Navigation documents our imports from China amount to \$7,005,144 per annum; and our exports to that country but \$2,155,945; leaving the im mense deficit of nearly \$5,000,000 per annum to be

Of these exports, \$1,894,418 were in manufactures ! of cotton, \$138,144 in lead, and \$100,549 in ginsen (root,) the balance being made up of miscellane ticles. Lead and ginseng, then, are the only cles of produce of real importance which we ap to China; and in view of the heavy balance of plete identity between our sea slug and bicho d mar of Chinese commerce is, indeed, of vast importancemore especially as it exists in such quantities of our shore as to render it almost impossible to walk over

them at low water without treading upon it.
